

Ai.Beyot + Lakeview — 24,000 EGP

What the two jobs paid, what they cost, and what is left.

Both payments came by InstaPay on 25 Oct; the videographer (26 Oct) and Seif's half (27 Oct) were paid by InstaPay from your CIB account. The AI was paid from your Credit Agricole card ••9470, which also carries your everyday spending; only the Higgsfield charges are listed. The same Higgsfield account was used for other clients in these weeks (Garmin, RAW, IRONMAN, a food shoot, CGL); their credits are not counted here.

COMING UP — CLAUDE, 30 OCT

Plan	Max 20x
------	---------

Renews	30 Oct, card ..9470
--------	------------------------

Price, with the 14% tax	\$200 + \$28 = \$228
-------------------------	-------------------------

Pounds per dollar, latest	56.21
---------------------------	-------

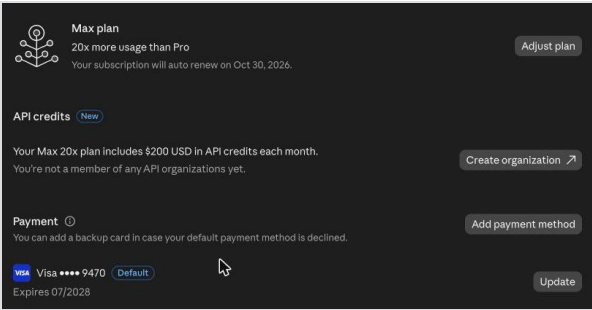

Expected charge	12,815.88
------------------------	------------------

Keep aside (with a little room)	13,000.00
---------------------------------	-----------

Left after keeping it aside	604.38
------------------------------------	---------------

How this was worked out. Your Claude billing page says Max 20x, renewing 30 Oct on card ..9470. Every invoice carries 14% tax on top of the plan: the \$100 plan billed \$114 and the \$20 plan billed \$22.80, so \$200 becomes \$228. Each invoice below was matched to its Credit Agricole text to get the pounds per dollar the card actually charged. The rate has been creeping up, 53.44 in August to 56.21 now, so the forecast uses the latest one: $228 \times 56.21 = 12,815.88$. Keeping 13,000 covers it even if the rate rises another 1.4%. This bill is not in the totals above; it has not been charged yet.

INVOICE	USD	BANK, EGP	RATE

16 Oct	\$51.30	2,883.47	56.21
16 Oct	\$28.50	1,601.93	56.21

Your Claude billing page, 26 Oct: the plan and the renewal date. The dollar amounts are your Anthropic invoices; the pounds are the matching CA-Egypt bank texts in Messages on the Mac (25 Aug 5,038.53 · 25 Sep 6,206.68 · 30 Sep 7,203.36 · 15 Oct 2,864.63 · 16 Oct 2,883.47 and 1,601.93).

How the credits are priced: they are used oldest first, so every credit costs what its own pack cost. Packs cost 2.15 a credit on 6 Oct and 3.34 by 20 Oct. Higgsfield's record and the bank texts agree: after every credit below is counted, the 61.22 left over is exactly the live Higgsfield balance.

CORRECTIONS

Rebuilt from Higgsfield's own record and the bank texts, not from the notes the editing chats kept.

AI.BEYOT CREDIT COUNT

The Ai.Beyot editing log adds up to **1,461** credits.

Higgsfield's record shows **1,441**. One batch in the log (88) was an estimate written before the charge. Priced from the record.

THE CGL TOP-UP

First shown as an estimate of **337.02** (half of the 21 Oct price for 200 credits), because the bank text had not reached the Mac.

The bank text says **363.43** (line 12). The money left goes down by the difference.
